

LEXAL DRILLING JARS

HYDRAULIC DRILLING JAR

The Lexal Double Acting Hydraulic Jars are designed to meet the challenging wellbores being drilled today. They feature Heavy Duty splines and floating pistons to allow operation in ultra deepwater applications. The integral Flex Sub allow for easy handling and large fluid reservoirs provide long life and consistent pull times.

- Manufactured from high-strength Alloy Steel
- Large fluid reservoir to allow for sustained jarring
- Internal impact faces to maximize impacts
- Floating piston balances tool for ultra-deepwater applications
- High-strength sealed splines for long service life
- Integral Flex Sub for easy handling

Specifications

TOOL OD	4.75"	6.75"
TOOL ID	2.75"	2.75"
TENSILE RATING	540,000 LBS	960,000 LBS
TORSIONAL RATING	22,000 FT-LBS	62,000 FT-LBS
UP JAR LOAD	110,000 LBS	210,000 LBS
DOWN JAR LOAD	95,000 LBS	200,000 LBS
TOTAL STROKE	22.5"	24.5"
