

LEXAL STRING SAVER

HIGH TORQUE DRILLING RELEASE SUB

The Lexal Oil Tools String Saver is a high torque, mechanically activated, controlled release tool. This tool allows operators to decrease risk and improve economics by introducing a predetermined backoff point into their Workstring. By allowing the operator to back off without the need for traditional wireline explosive backoff operations or for circulation, decisions can be made in real time and risk can be reduced.

Tool OD	5.00"	7.00"
Tool ID	2.25"	2.75"
Tensile	400,000 lbs	*TBD*
Torsional	30,000 ft-lbs	80,000 ft-lbs
Max Activation Load	70,000 lbs	*TBD*
